ORDER:

In the letters read above, the Engineer-in-Chief (R&B) Roads, Hyd., has stated that the details of the following two works in West Godavari District, are as follows:

i) Improvements to Kanuru – LankalaKoderu road from km: 28.890 to 41.710.

Kanuru - Lankalakoderu road is an important MDR in W.G District having a total length of 41.710Kms. This road connects a number of villages like Alamuru, Oduru, Nelamuru, Kommuchikkala, Valamarru, Kapavaram&Lankalakoderu apart from connecting important roads i.e., Narsapuram – Aswaraopet road (SH), NH214A, Vemavaram - Lankalakoeru Road, Rameswaram - Kavitam Road and other PR Roads. The road is used to transport agriculture and aquaculture produce from the above villages to the nearby market places. Traffic intensity on this road is 1865CVPD& CBR value is 4%.

The road is having single lane from Km 28/890 to 41/0 and intermediate lane from 41/0 to 41/710. These stretches were renewed in the year 2008-09. The existing soils are very poor with low CBR. Further due to heavy cyclonic rains during August, 2013 to November, 2013 and heavy traffic, these stretches are badly damaged forming deep pot holes and sunken portions thereby causing lot of inconvenience to the vehicular traffic. Hence it is very essential to improve the road by strengthening in general , widening at selected reaches based on local traffic considerations and providing CC pavements including drains in village limits to arrest water stagnation and prevent recurring damages to the road.

ii. Improvements to Penumantra –Veeravasaram road from km: 0.000 to 12.470.

Penumantra - Veeravasaram road is very important MDR in W.G.Dt. It connects a number of villages like Brahmanacheruvu, Polamuru, Nowduru, Budharayuducheruvu, Panjavemavaram, Thokalapudi & Veeravasaram apart from connecting important roads i.e., Narsapuram-Aswaraopet road(SH) and NH214A. The road is used to transport aquaculture produce from the above villages to the nearby market places. Traffic intensity on this road is 1750 CVPD&CBR value is 4%.

(PTO)

Further due to heavy cyclonic rains during August, 2013 to Nov, 2013 and heavy traffic, these stretches are badly damaged forming deep pot holes and sunken portions thereby causing lot of inconvenience to the vehicular traffic. Hence it is very essential to improve the road by strengthening in general, widening at selected reaches based on local traffic considerations and providing CC pavements including drains in village limits to arrest water stagnation and prevent recurring damages to the road.
